MEDICAL PRODUCT DEVELOPMENTS WITH SWICOFIL, EXPERT IN YARN AND FIBER SPECIALITIES FOR MEDICAL APPLICATIONS

Yarns and fibers are a crucial part of the medical and health industry. Such product developments are however regulated by many different aspects and require highest standards. In-depth knowledge and considerable market experience from Swicofil's side facilitate your product engineering.

HERE FOR YOU

Swicofil is your partner for new and improved product developments for medical and health end uses. Thanks to many completed medical projects in the past, Swicofil knows the procedure for medical developments and its key elements, including the necessity of providing certain certificates to you.

Moreover, Swicofil is accustomed to any additional administrative efforts medical end products cause. An insatiable spirit for new challenges and a network of professional supplier partners further assure intelligent, pragmatic and excellent solutions that meet medical grade standards.

WHAT DOES SWICOFIL DO? Assessment of your project and its requisites, guided product development in collaboration with you, evaluation of chances and alternatives as well as raw material sourcing including the possibility to develop yarns up to your requirements.

HOW DOES THIS BENEFIT ME? Amongst the many advantages listed on the next page you benefit from, you invest less time, less money and less worries in the overall sight as Swicofil knows the market, which specifications will be needed and other essential key points.

FOR WHAT KIND OF PROJECTS? For any medical or health project where yarn or fibers could be a solution - may the project sound ever so crazy.
